

Good morning,

There is some important information in this, so read it, please.

Here is the 11th and final assignment for the fall term. Please work neatly. The markers will appreciate it.

All of your assignments should be submitted by the deadline shown below. If not, the marker will not have a chance to mark them and return them to you. Anything handed in after the 4th may not get back to you before the exam, and may not make it to your portfolio. You may not, under any circumstances, hand in assignments after the last day of classes in the term. Given the fact that our exam occurs early in the exam schedule, I suggest you have them in no later than the 4th. I will make the solutions available to you by the mechanism I mentioned in class. Assignments 1-8 are there now, and 9 will be posted today. 10 and 11 will follow when appropriate. Note the time for the help sessions given at the top of the web site. This is your chance to sort out any issues you have with the course material.

From the third edition of Physics for Scientists and Engineers, by Randall Knight

Chapter 33:

Conceptual Questions 13, 14

Exercises & Problems 5, 13, 19, 33, 49, 50

Assignments are to be handed in by placing them in the appropriate slot in the box mounted on the wall outside of the ECE office (D36) - see the long version of the course syllabus for instructions and photos. The deadline for submission is Friday, Dec. 4th at 4:00 p.m.. The marker will pick up the assignments shortly after that time.
